PIYUSH GHUNGRUD

Senior BI Developer / Engineer | Power BI • DAX • SQL • Snowflake • Microsoft Fabric

piyushghungrud@gmail.com | +91 8698932798 | Hyderabad, IN | LinkedIn | Portfolio Website | GitHub

PROFESSIONAL SUMMARY

BI Engineer with 4+ years delivering analytics solutions across pharma, healthcare, and commercial analytics domains — including direct project delivery for Sanofi, Opella, Abbott & Reckitt. Specialised in Power BI architecture, advanced DAX, and semantic modelling, with strong SQL expertise across modern data platforms including Snowflake, Azure Databricks, and Microsoft Fabric. Proven track record in performance optimisation and translating complex stakeholder requirements into decision-ready dashboards with minimal supervision — delivering measurable business impact across global pharma and healthcare engagements.

CORE SKILLS

- **Power BI & BI Engineering:** Power BI (Desktop & Service), DAX, Power Query (M), Semantic Modelling, Star Schema, Dimensional Modelling, RLS, Power BI Performance Optimisation, DAX Studio, Tabular Editor, VertiPaq Analyzer, Power BI Governance
- **Data & Platforms:** SQL, Snowflake, Azure Databricks, Microsoft Fabric, ETL Pipeline Design, Data Modelling, Data Validation, Data Integrity Checks
- **Programming & AI:** Python, GenAI Integration, LLM APIs, Prompt Engineering
- **Visualisation & Storytelling:** Dashboard UI/UX, Prototyping, Interactive Design, Data Storytelling, KPI Design
- **Other BI & Analytics Tools:** Tableau, QlikView, Apache Superset, Salesforce Lightning, Databricks BI, Git, Power Automate, MS Excel, MS PowerPoint, Figma
- **Project Methodology:** Agile/Scrum, Process Automation, Operational Excellence

PROFESSIONAL EXPERIENCE

SDE II | Solutionec, Bengaluru, IN — Oct 2022 – Present

- Designed a scalable Power BI platform across **3 workspaces** — **30+ reports** serving **60+ stakeholders** across Sales, Operations, and Leadership — with sensitivity labels, data lineage, and access governance per pharmaceutical compliance requirements.
- Owned requirements gathering, dimensional modelling, and ETL validation across **7+** end-to-end BI projects, managing **2** concurrently; mentored developers and partnered with Commercial and Operations stakeholders to turn ambiguous requirements into governed BI solutions.
- Cut dashboard load time from 20s to under 5s (**75% faster**) via DAX Studio, VertiPaq Analyzer, and Performance Analyzer tuning; reduced Power Query refresh from 45 to 20 minutes (**55% faster**) through query folding, incremental refresh, and storage-mode optimisation.
- Set up Git-based source control with **CI/CD deployment pipelines**; administered Power BI Service (gateways, scheduled refresh, REST API/PowerShell automation) and migrated Tableau, QlikView, and SSRS reports to governed Power BI.

KEY PROJECTS

Clinical Patient Journey & Engagement Dashboard — Sep 2025 – Jun 2026

- Architected an end-to-end clinical analytics solution on **Power BI, Microsoft Fabric,** and **Azure Databricks —** built Fabric **Dataflow Gen2 ETL** pipelines into a **Lakehouse/OneLake layer,** with dimensional models spanning 10+ years of patient data across care pathways, treatment timelines, and referral KPIs.
- Integrated **3 data sources** into a unified Power BI semantic model on **Microsoft Fabric** — using OneLake as the centralized analytics layer and **Dataflow Gen2** for reusable, low-code transformations; delivered interactive dashboards used by clinical and operations leadership for patient trend and engagement analysis.
- **Replaced manual PowerPoint-based reporting** with a fully automated analytics solution — cutting turnaround from 2.5 days to under 1 hour (**97% faster**) and enabling timely, data-driven decisions for clinical teams.
- Led UAT validation cycles with business stakeholders — verifying data accuracy, performance, and visual consistency to deliver a governed, production-ready solution within **Agile sprint** timelines.

Global Pharma Field Force Analytics Jun 2024 – Oct 2025

- Built **15+ executive dashboards** tracking pharmaceutical sales, competitor analysis, and market share across hierarchies for **15 countries** — one parameterized report replaced 15 separate builds, cutting development time by **70%**.
- Configured **RLS** across **5 regions** — restricted **200+ users** to authorised geographic data per GDPR and pharmaceutical compliance requirements.
- Implemented Object-Level Security (**OLS**) to restrict specific user groups from sensitive tables and measures, complementing RLS for full row- and object-level governance.
- Implemented **multi-language support** — instant UI conversion on language selection, boosting global user adoption by **40%** and cutting onboarding time.

Pharma Sales Performance & Territory Analytics Nov 2023 – Oct 2024

- Engineered a **dual-source Snowflake integration** across two independent servers with no native joining key — resolved via custom **Brick and HCO mapping logic** to unify HCP and Sales datasets into a single Power BI semantic model built on star schema architecture.
- Developed a **2-month sales forecasting model** using multivariate linear regression — integrated predictions into Power BI achieving **70%+ average accuracy**, enabling sales leadership to proactively plan territory coverage and revenue targets.
- Built a **6-level geographic hierarchy** with full drillthrough capability — delivering a brand marketing story from HCP recommendation through to HCO-level sales performance, actively used by sales reps to identify HCO/HCP hotspots across territories.
- Designed **Brand Focus HCP Targeting** views recommending high-priority HCPs per brand — empowering sales representatives with actionable targeting intelligence at every hierarchy level, from subnational territory down to individual HCP profiles.

INTERNSHIP

Data Science Intern | The Sparks Foundation Jun 2022 – Jul 2022

- Analysed retail sales data to surface underperforming products and built interactive dashboards for the Sales Manager to support regional profitability decisions, alongside a COVID-19 case-trend analysis tracking spread and recovery rates.

PERSONAL PROJECT

DataChat - AI-Powered Analytics Assistant Jan 2026

- Built a GenAI-powered analytics assistant (Python, Streamlit, Groq LLaMA 3.1, Pandas, Plotly) orchestrating AI agents for natural language interaction with structured datasets — LLM-generated code executes locally under a metadata-only prompt architecture with a self-healing retry loop auto-correcting failed outputs, keeping raw data in-environment for safe enterprise deployment.

EDUCATION

Bachelor of Science – Computer Science
RTM Nagpur University, India Jun 2017 – Mar 2020

CERTIFICATIONS

- Microsoft Certified: Fabric Analytics Engineer Associate (DP-600) – Microsoft, May 2026
- Microsoft Certified: Power BI Data Analyst Associate (PL-300) – Microsoft, Jun 2025
- Microsoft Certified: Fabric Data Engineer Associate (DP-700) – Microsoft, Aug 2026
- Hands-On Essentials: Data Engineering Workshop – Snowflake, May 2025
- Data Science – Odinschool, Jun 2022

ACHIEVEMENTS

- Innovation Award, SolutionLab Hackathon 2024
- People's Choice Award, SolutionLab Hackathon 2024
- Employee of the Quarter – Solutionec, Q1, 2023
- Epitome of Teamwork – Solutionec, Q2, 2023
